Chemical Cases under 9(4) TIM

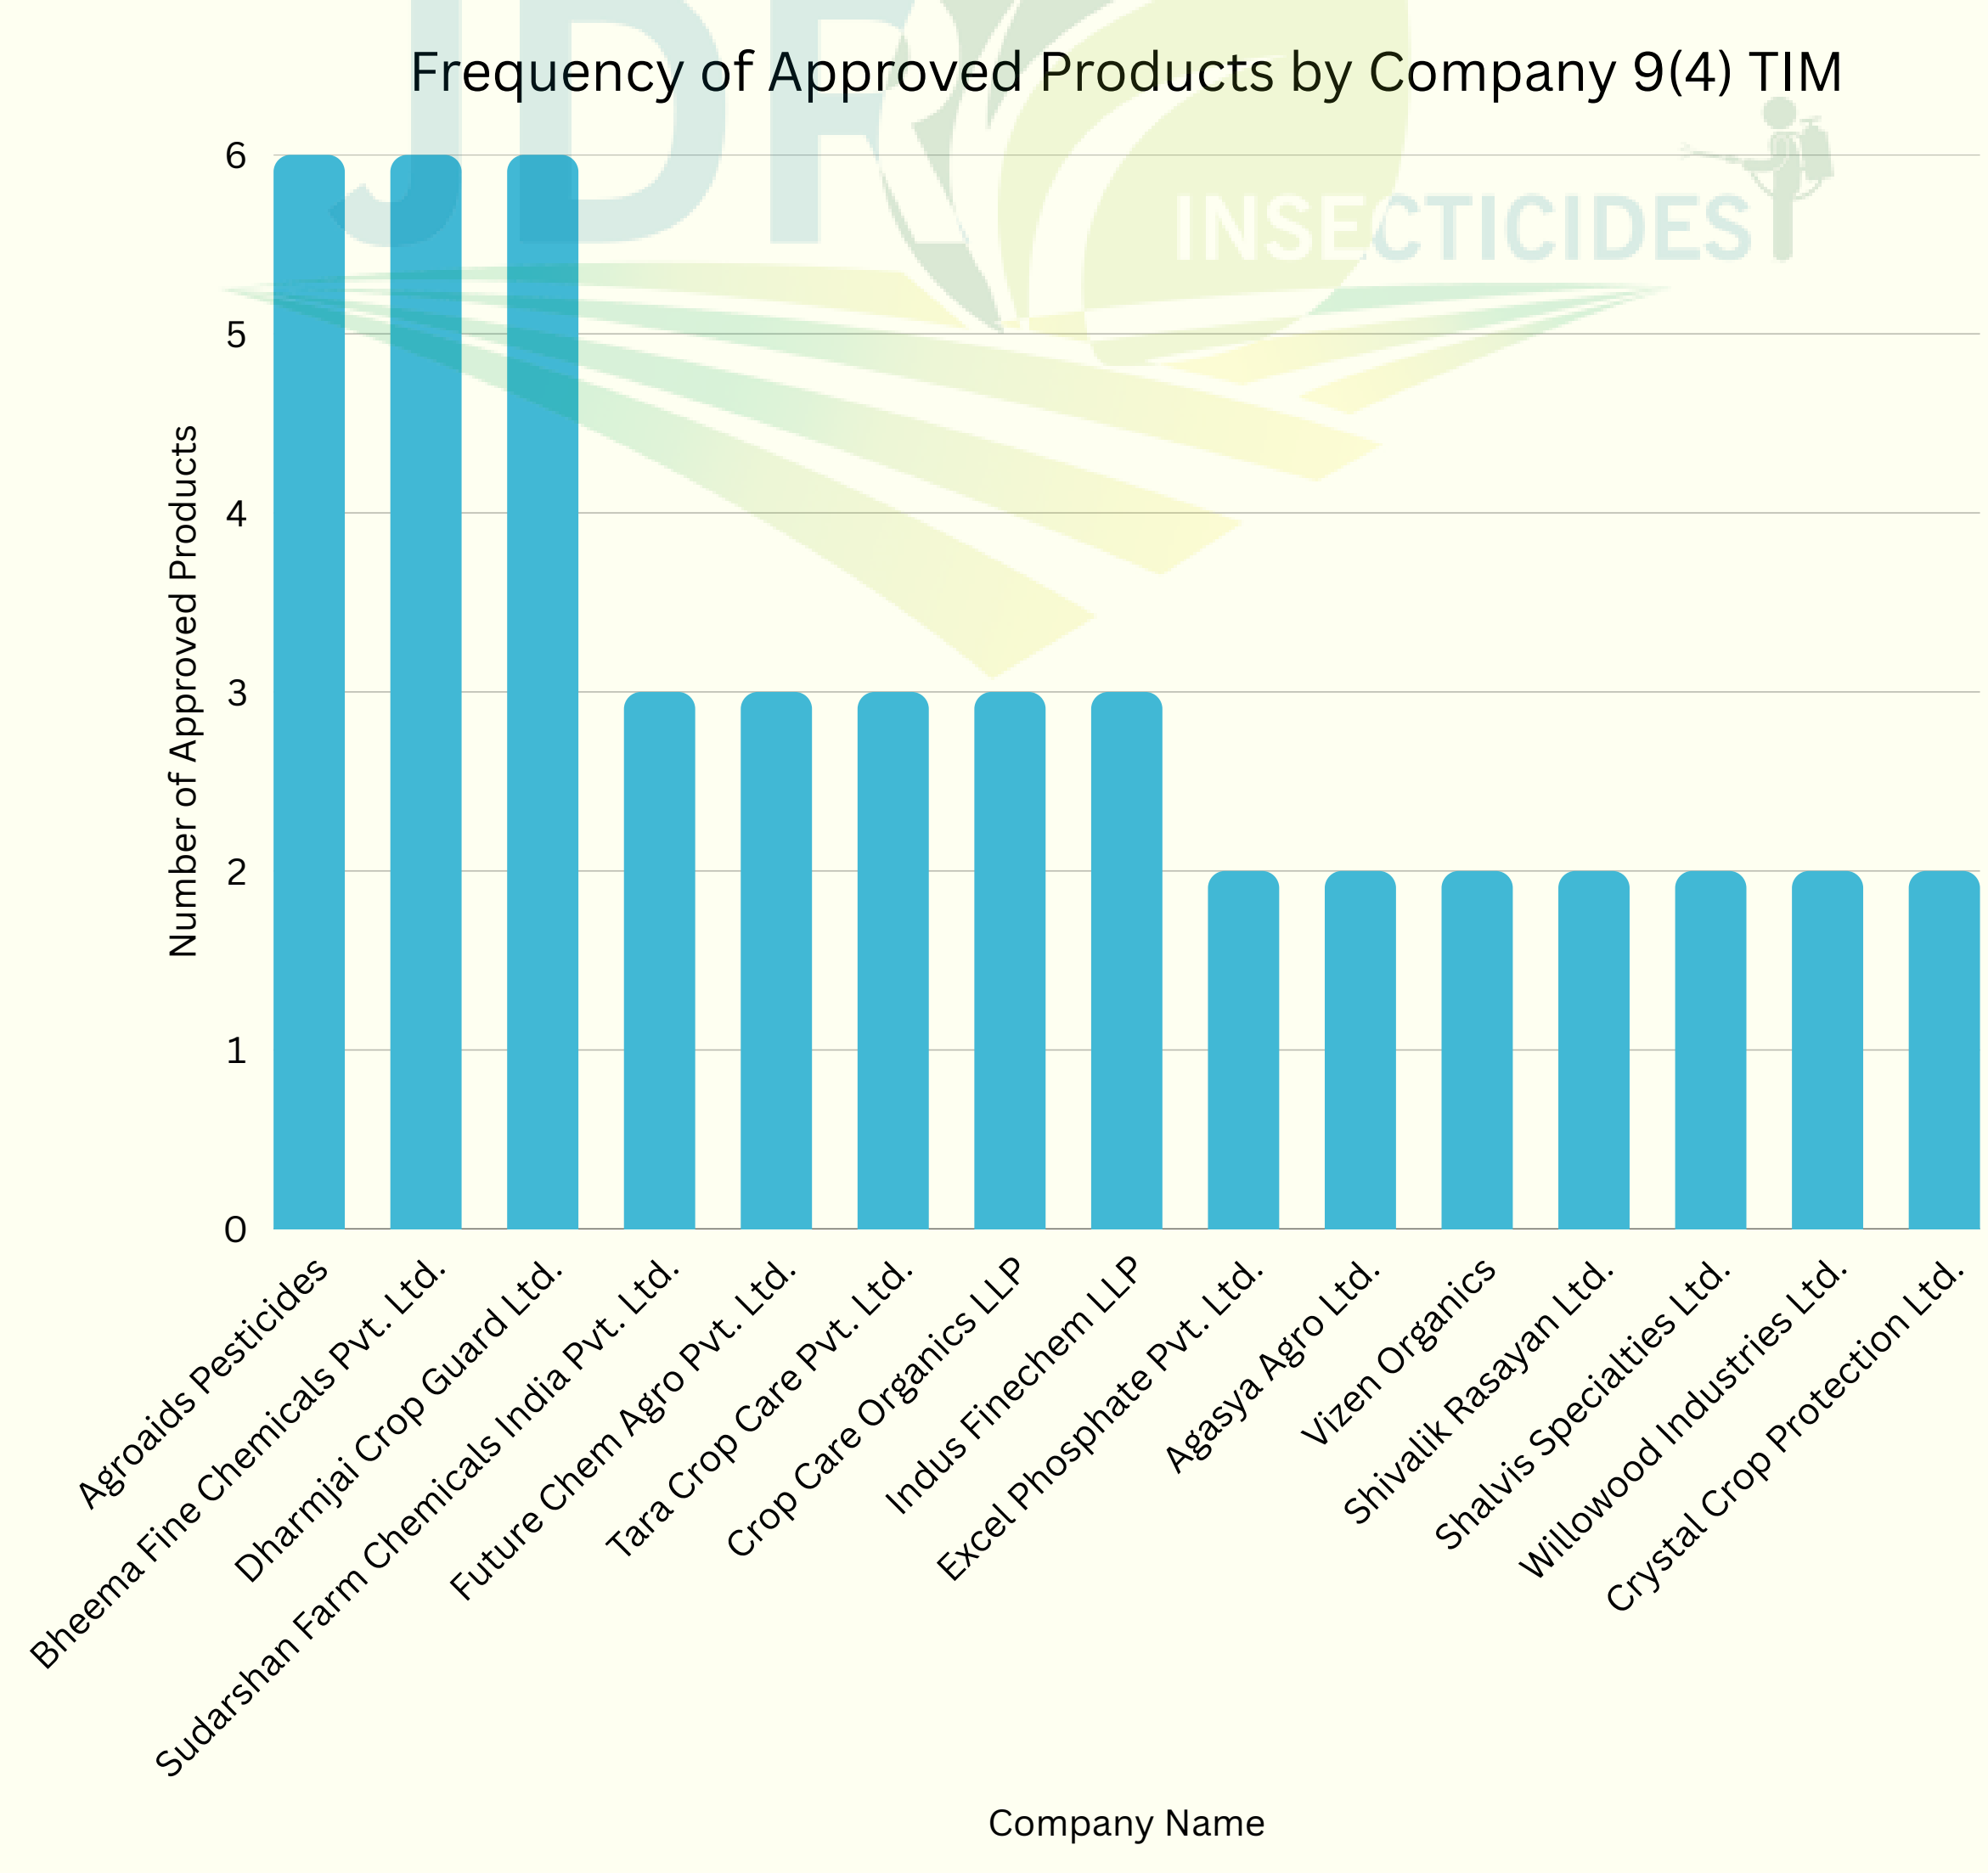

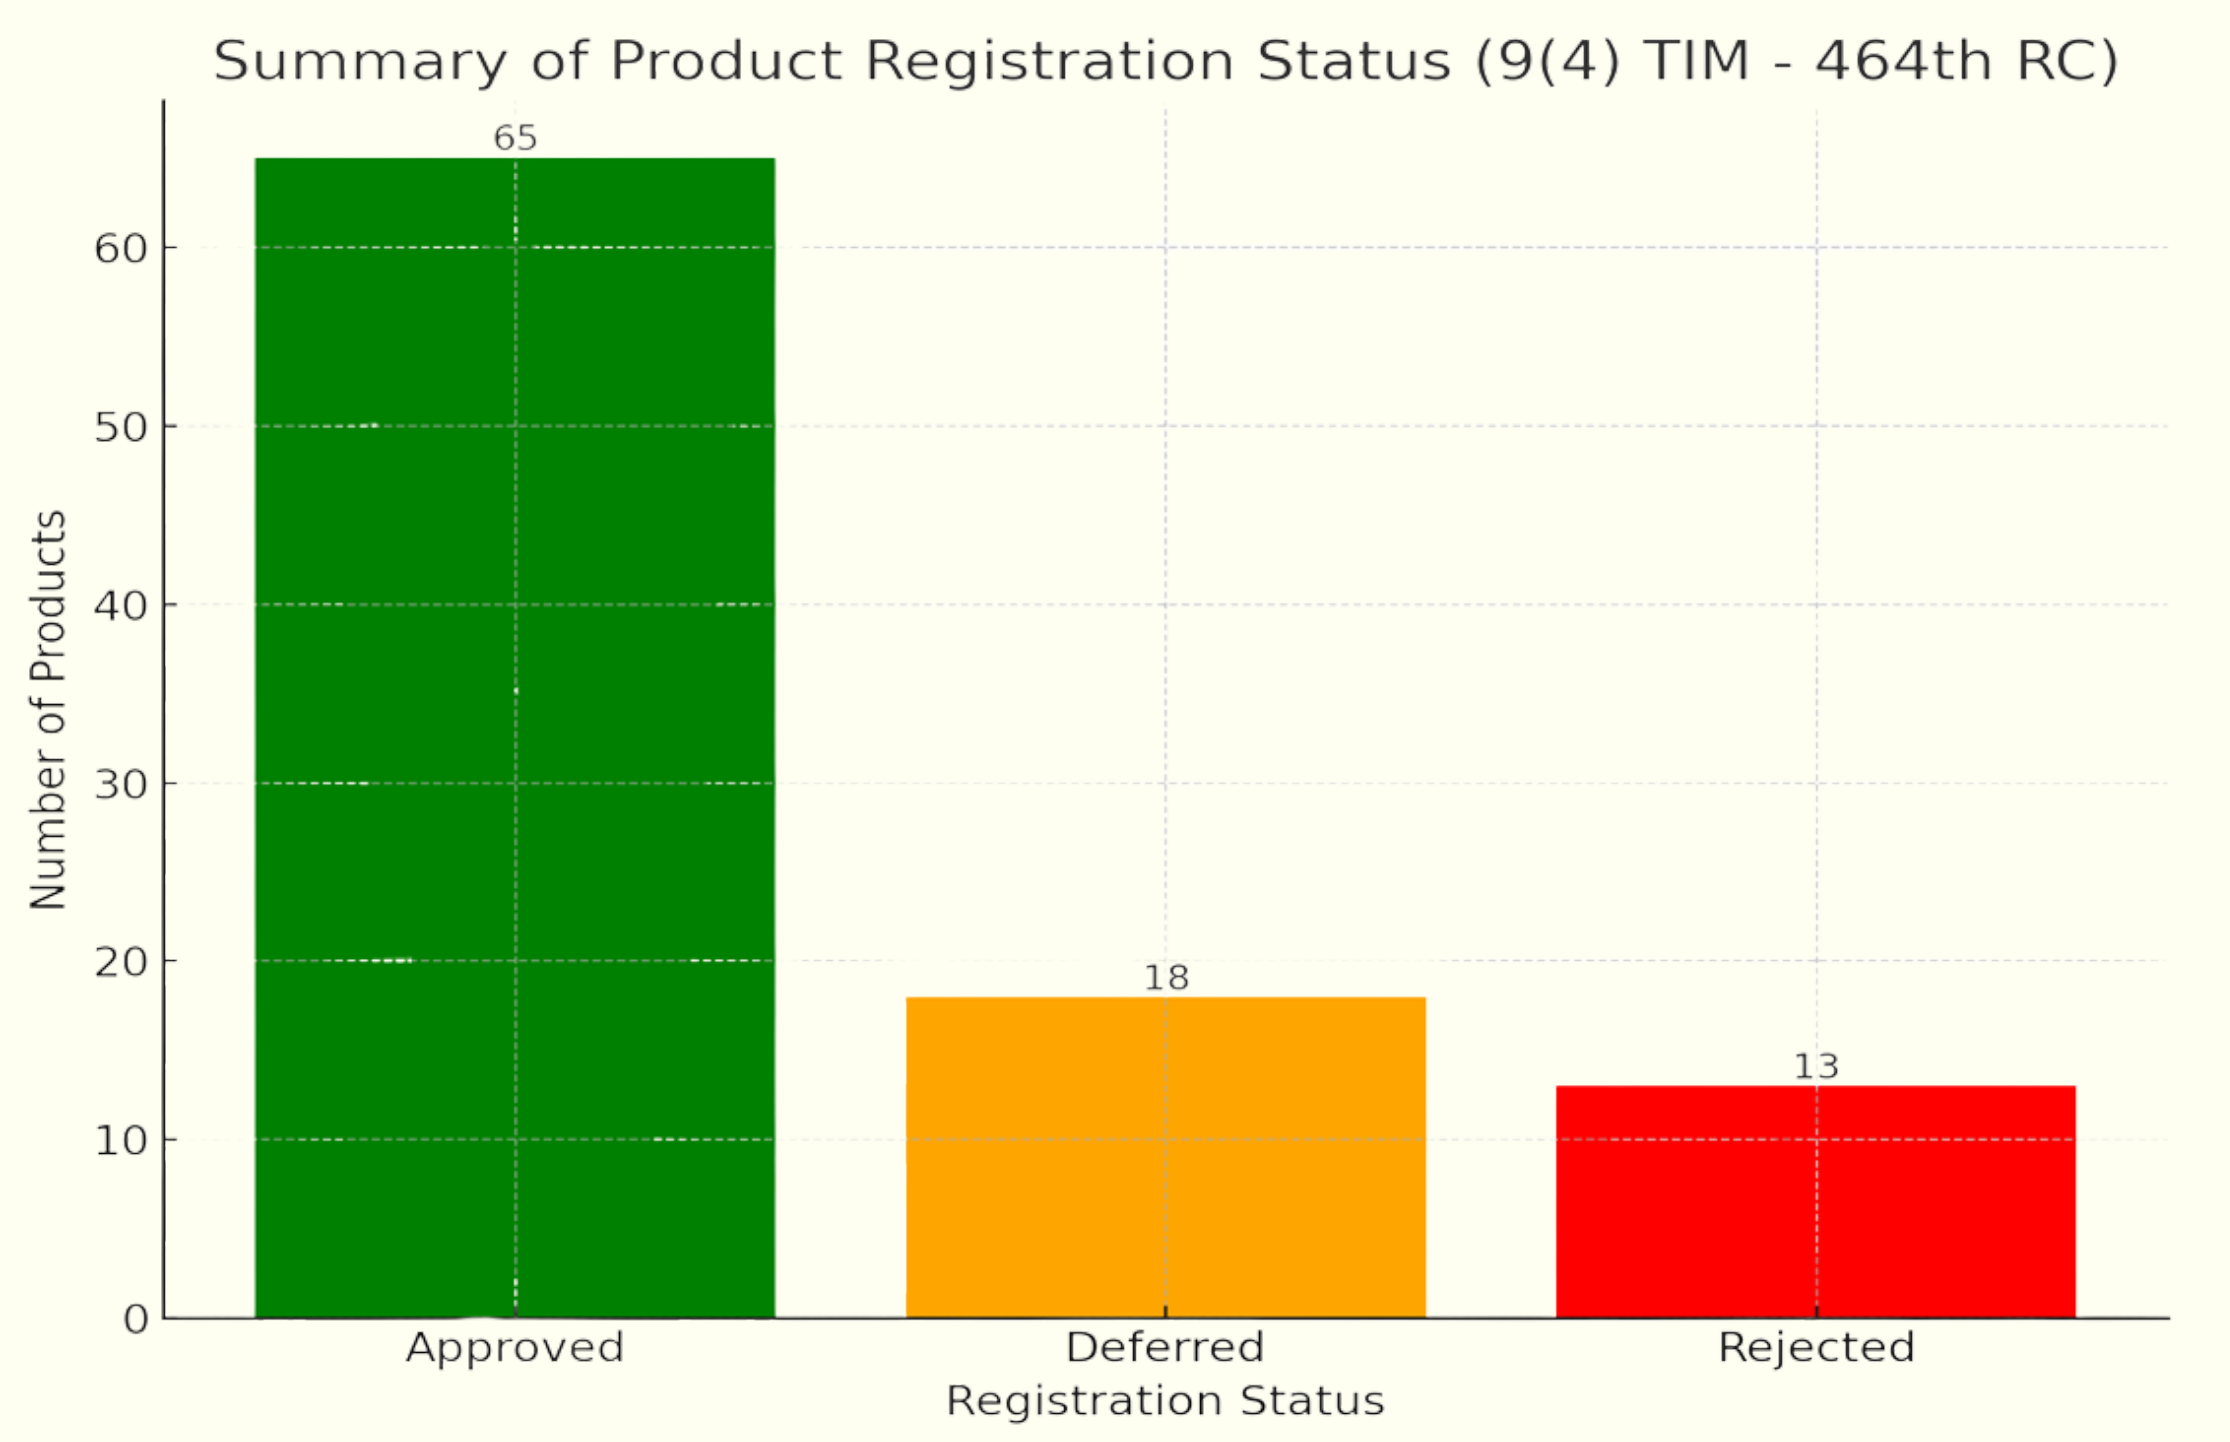

Out of the total 96 applications filed under section 9(4) TIM in the 464th RC meeting, a total of 66 products were approved, indicating strong compliance with technical standards and regulatory guidelines. 16 cases were deferred, primarily due to the need for clarification from CIL regarding chemical composition or unknown impurities. 14 applications were rejected, commonly due to higher impurity levels, unsatisfactory active ingredient (a.i.) content, or NIL a.i. found in the ATR (Analytical Test Report) from CIL. This reflects the committee's emphasis on strict quality compliance and scientific verification before granting indigenous technical manufacturing approvals.
